CAREER SUMMARY

Currently pursuing a transition from a cloud devops intern to a full-time role within the cloud domain, leveraging my background in client-facing positions with notable achievements in the field.

EDUCATION

University

Graduated: July 2021

Bachelor of Technology, Computer Science (GPA: 3.0)

Organizations: Poornima Institute of Engineering & Technology

CERTIFICATIONS

AWS Educate Introduction to Cloud 101 – AWS

Business Analyst for Statistics

Linux Red hat Certified System Administrator (RHCSA - EX200) - Udemy

TECHNICAL PROJECTS

- **Image Labels Generator using Amazon Rekognition:** Developed an advanced image labels generator utilizing Amazon Rekognition, integrating machine learning and computer vision for automatic analysis and generating descriptive labeling of images.
- **Develop a text narrator using Amazon Polly:** Created a custom text-to-speech narrator utilizing Amazon Polly for efficient and expressive audio rendering, optimizing user experience.
- **Build an AWS multi-tier architecture:** Designed and implemented multi-tier architectures on AWS for an Associate Solution Architect lab, leveraging EC2, ELB, and RDS for scalability and fault tolerance. Utilized CloudFront and VPC for enhanced performance and security.

WORK EXPERIENCE

Froogal.ai

Jan 2024 - Current

Cloud Devops Engineer

Hyderabad, India

- Assisted in configuring and maintaining cloud environments using AWS, improving service reliability.
- Automated deployment and integration processes, speeding up project delivery.
- Monitored cloud performance and fine-tuned resource usage to enhance system efficiency.

Cloud Devops Intern

Oct 2023 – Dec 2023

Hyderabad, India

- Supported cloud deployment and management tasks, gaining hands-on experience in public cloud platforms, devops practices, and security.
- Monitored system performance and improved resource use.
- Provided technical support and troubleshooting for cloud-based applications and services.

Uber

Mar 2022 – Oct 2023

Service Analyst

Hyderabad, India

- Managed performance and optimization for Uber for Business gift card services by analysing data, enhancing user experience, and streamlining processes.
- Developed dashboards and reports to monitor key metrics, driving data-driven decisions and improving service delivery.
- Worked closely with the engineering team to troubleshoot and resolve issues, ensuring system reliability and performance.

KOL & Peers Analytics

Data Analyst

Mar 2021 – Mar 2022

Jaipur, India

- Compiled and meticulously analysed comprehensive datasets about medical professionals from diverse platforms, uncovering valuable insights into the healthcare landscape.
- Created detailed visualizations and reports to present findings to stakeholders, supporting strategic planning and decision-making.
- Utilized statistical analysis to identify trends and patterns, driving actionable recommendations and improving data accuracy.
